A TECHNO INDIA GROUP PUBLIC SCHOOL, GARIA PUBLICATION

### TIGPSG STUDENTS SHINE AT CBSE SKILL EXPO

Sreeja Sarkar, IXB

We had the privilege of participating in the CBSE Skill Expo held at KIIT University, Bhubaneswar. We express our heartfelt gratitude to our respected Principal Ma'am for providing us this enriching opportunity. Under the guidance of our mentor teacher, Ashima Ma'am, my friend Sreejita and I embarked on this exciting journey. The independence and responsibility that came with it were both thrilling and liberating.

- The expo featured an array of skills, including IT, electronics, automotive, and more.

- We showcased our project "FROM EARTH WITH LOVE" demonstrating our skills on herbal soap making on our theme "BEAUTY, HEALTH & MENTAL WELLNESS".

- The event provided an excellent opportunity for us to interact with students from other schools, sharing knowledge and learning from each other.

- Around 1500 Principals came from different CBSE schools across the country to witness this event themselves.

- Only 20 schools had been selected for the exhibition from all over India.

We gained valuable insights into the importance of skill development and vocational education. The expo also helped us develop essential skills such as teamwork, communication, and problem-solving. CBSE Chairperson, Shri Rahul Singh, CBSE Director for Skill Education, Shri Biswajit Saha and many other respected officials, congratulated the students on their stupendous efforts. Each and every feedback was positive and they really appreciated us.

We are grateful to our respected Principal Ma'am for her guidance and support throughout the event. When we reached the Bhubaneswar station on 20th of November, Ma'am picked us up and escorted us to the KIIT Guest House. Accommodation and food were really good. The experience has motivated us to continue developing our skills and exploring new areas of interest.

### Call of Water: A Review

Trisha Mitra, Faculty, Dept. of English

France has always impressed us with its repertoire of films made by eminent directors like Truffaut, Godard, Renoir and so on. I got an opportunity to watch a French film entitled 'Call of Water' at the 30th Kolkata International Film Festival which was held in Kolkata from 4th to 11th December, 2024. Directed by Elise Otzenberger, the plot revolves around a 9-year-old boy Simon who starts to behave in a strange manner after coming back from a vacation at a sea beach. He confesses to his mother Sarah that he can hear extraterrestrial voices whenever he goes underwater. Cecile de France as the mother of Simon does perfect justice to the role, the way she tries to create an emotional bond with her son Simon has been deftly handled by the director. Simon tries to involve his little brother in his world of fantasy and the trio (Simon, his mother and his brother) enjoy being a part of the elements of fantasy much away from the hardcore realistic world. The blending of subtle emotions with magic realism by the director is commendable. The unraveling of Sarah's psyche takes place towards the end of the film when she tries to create her own space and gradually discovers her own self. Initially, the pace of the film is slow but as Sarah embarks on a journey of rediscovering herself, the film picks up its pace. Brilliant cinematography captivates the viewers as it captures the bird's-eye shots of the ocean beautifully. Sarah's journey along with her children to explore the world of mystery and unknown impresses the viewers and therefore the movie is highly recommended for all.

# **PLEDGE FOR ENERGY INDEPENDENCE**

We Techno India Group Public School, Garia as a responsible organization, realize the climate crisis is threatening our existence on this planet - our only home.

It is our duty to conserve the environment.

We realize that our consumption of petrol, diesel, coal and gas, and mindless use of materials like furniture, buildings, roads, clothes, etc. have caused the climate crisis and everything in its totality is worsening the situation with every passing second.

Hereby We take oath that We will minimize our consumption of energy and materials, reduce our carbon footprint and eventually bring it to zero.

We pledge to take efforts to switch towards the sustainable and cleaner form of energy and adopt Energy Swaraj or Energy Independence for sustainable living.
